

GR- 446 ISOLIERGRUND

BARRIER VARNISH

WATER BASED

It is a protective anti-tannin primer for tanned woods such as chestnut, oak cedar, indoors and outdoors. It eliminates the color bleeding effect of the grain on white and light colors. Helps prevent and delay the appearance of tannin marks that naturally come into contact with moisture on the surface of wood.

FEATURES

- High resistance to tannin stains
- Easy to apply
- Colorless

APPLICATION

Conventional Spray:

Recommended to use 2-2,5 mm nozzle with 3-4 air bar.

Application Equipment:

- Flow-coating
- Spray
- Brush
- Wipe application

CONSUMPTION

An area of 10-12 m²/lt is painted on one coat depending on absorbency and type of surface. Field sample work should be carried out for precise consumption.

DRYING TIME

(23°C and %50 Humidity)

Touch Dry: 1 Hours

Sanding: 2 Hours

Stackable: 24 Hours
